Annual Index Vol. 11 (1-10), 1976

Subject Index

A General Stoichiometric and Thermochemical Model for SCP Yields (Dec) 2
A New Approach to Sulphur Dioxide Analysis (May) 47
A Novel Method of Growth Estimation for Suspension Cultures (May) 41
An Approach to Effluent Treatment in the Food Industry (Dec) 14
A Study of the Biological Treatability of the Trade Effluent Produced from the Manufacture of Ion Exchange Resins: the use of Adenosine Triphosphate and Adenylate Charge (Jan/Feb) 21
A survey of SCP Production Facilities (Dec) 32
ACHEMA Preview (June) 46
Activated sludge, Microbiology and (Jan/Feb) 3
Advances in Filtration and Separation Techniques in the Brewing Industry (Sept) 14
Affinity Chromatography in the Purification of Diagnostic Enzymes (July/Aug) 20
Air deodorisation, destructive at a Dublin sewage works (Jan/Feb) 26
Albumen, A New Chromatographic Method Suitable for Large Scale Purification of (Nov) 23
Alcohol a Programme, Brazils National (June) 29
Alcohol, Yeasts for Molasses (March) 10
Amino acids, the Production of (March) 4
Amylase, Nutrients Affecting the Production of Protease and Dextrinogenic (June) 42
Animal By-Products, Processing of (Dec) 9
Antibiotic Recovery Process—a Demonstration Simulation of Filtration and Extractions. Followed by Coordinated Optimisations in an (April) 25

BASF Opens Giant Effluent Treatment Plant (Jan/Feb) 35
Biocides, Evaluation for Use with Petroleum Products (July/Aug) 36
Biocides, Laboratory Procedures of Assessing the Potential of Antimicrobial Agents as Industrial (July/Aug) 30
Biological Problems in Blood Storage (Sept) 26
Blood Storage, Biological problems (Sept) 26
Brazil's National Alcohol Programme (June) 29
Brewex 76 Exhibition Preview (March) 40

CALF Rennet Substitutes (May) 10
Carbon 13, Elucidation of Biosynthetic Pathways with (Nov) 7
Cellulose to Glucose, Pilot Plant Conversion of (Dec) 26
Cephalexin, Enzymatic Synthesis of (Oct) 21
Chitosan—A Polymer from Seafood Wastes —for use in Treatment of Food Processing Wastes and Activated Sludge (Jan/Feb) 13
Chromatography, High Speed (May) 6
Chromatographic Method Suitable for Large Scale Purification of Albumen, A (Nov) 23
Computer in the Brewhouse, The (April) 10
Cultures, Starting Investigational and Production (April) 7

DAIRY Products in the Food Industry, The Utilisation of (Oct) 13
Destructive Air Deodorisation at a Dublin Sewage Works (Jan/Feb) 26
Detection of Contamination in Pharmaceutical Products (Nov) 3
Developments at the Water Research Centre (Sept) 24
Developments in Filtration and Separation Techniques in the Brewing Industry (Sept) 14
Digestion of Aqueous Wastes with Oxygen (June) 8
Dipslide Technique for Microbial Testing, Evaluation of the (July/Aug) 39

EFFLUENTS from Malting and Brewing (March) 17
Effluents, Identification and Removal of Toxic Materials from Kraft and Groundwood Pulp Mill (Jan/Feb) 7
Effluent Treatment in Singapore, Trade (March) 2
Effluent Treatment in the Food Industry, An Approach to (Dec) 14
Effluent Treatment plant, BASF Opens giant (Jan/Feb) 35
Effluents, Tertiary Treatment of Sewage (Sept) 21
Elucidation of Biosynthetic Pathways with Carbon 13 (Nov) 7
Energy Relationships of Fuels from Biomass (Nov) 28
Engineering of Fermentation Plants Part 1 Design Aspects (April) 13
Engineering of Fermentation Plants Part 11 Fermenter Design and Scale-up (May) 37
Engineering of Fermentation Plants Part III Automation (June) 31
Enzymatic Synthesis of Cephalexin (October) 21
Enzymes, Immobilised for Industrial use (Sept) 3
Enzymes, Microbial Alkaline (July/Aug) 3
Enzymes, Stabilisation of by Glycosylation (July/Aug) 25
Evaluation of Biocides for Use With Petroleum Products (July/Aug) 36
Evaluation of the 'Dipslide' Technique for Microbial Testing (July/Aug) 39

FERMENTATION, Oxygen Participation in, Part 1 Oxygen Micro-organism Interactions (June) 19
Fermentation Plants, Engineering of Part 1 (April) 13, Part II (May) 37, Part III (June) 31
Fermenters, Measuring pH and Oxygen (April) 19
Filters to increase Plant Capacity, Use of Belt Discharge Vacuum (April) 42
Filtration and Separation Techniques in the Brewing Industry, Advances in (Sept) 14
Filtration by the Addition of Enzymes, Improvement of beer by (July/Aug) 27
Fish Quality, Instrumental Techniques Applied to the Measurement of (Oct) 25
Fish Silage (Dec) 17
Food Industry, The Role of the Quality Control Chemist (May) 30
Food Industry, The Utilisation of Dairy Products in the (Oct) 13
Fructose Syrups, Pure (Dec) 20
Fuels From Biomass, Energy Relationships of (Nov) 28

GLUCOSE, Pilot Plant Conversion of Cellulose to (Dec) 26

HIGH Speed Chromatography of Biochemicals (May) 6
Hydrocarbons, Some Economic Considerations: Solvents From (April) 32

IDENTIFICATION and Removal of Toxic Materials from Kraft and Groundwood Pulp Mill Effluents (Jan/Feb) 7
Immobilised Enyzmes for Industrial Application (Sept) 3
Institute of Water Pollution Control, Annual Conference (Nov) 25
Instrumental Techniques Applied to the Measurement of Fish Quality (Oct) 25
Ion Exchange Resins, A Study of the Biological Treatability of the Trade Effluent Produced from the Manufacture of (Jan/Feb) 21
Iron and Micro-organisms (June) 12

LABORATORY Procedures of Assessing the Potential of Antimicrobial Agents as Industrial Biocides (July/Aug) 30

MALTING and Brewing, Effluents from (March) 17
Measuring pH and Oxygen in Fermenters (April) 19
Microbial Alkaline Enzymes (July/Aug) 3
Microbiology and Activated Sludge (Jan/Feb) 3
Mixed Microbial Cultures as a Basis for Future Fermentation Processes (Oct) 30

NUTRIENTS Affecting the Production of Protease and Dextrinogenic Amylase (June) 42
New Method of Grape Processing for Wine Making, A (Nov) 15

OXYGEN, Digestion of Aqueous Wastes with (June) 8
Oxygen Participation in Fermentation, Part 1 Oxygen Micro-organism Interactions (June) 19
Optimal Carbon Source Concentration for Pectrolytic Enzyme Formation of Aspergilli (July/Aug) 11

PACKAGE Sewage Process (Jan/Feb) 29
Pectolytic Enzyme Formation of Aspergilli Optimum Carbon Source Concentration for (July/Aug) 11
Pharmaceutical Industry, Glass-fibre Filters in the (April) 38
Pharmaceutical Industry, Purified Water in (Nov) 12
Pharmaceutical Products, Detection of Contamination in (Nov) 3
Pilot Plant Conversion of Cellulose to Glucose (Dec) 26
Practical Aspects of Anaerobic Digestion (June) 3
Processing of Animal By-products (Dec) 9
Processed Food Carbohydrates and their Physiological Properties in Relation to Structure (May) 18
Production of Sugars from Waste Cellulose by Enzymatic Hydrolysis: Primary Evaluation of Substrates (Oct) 2
Pure Fructose Syrups (Dec) 20
Purification of Diagnostic Enzymes, Affinity chromatography in the (July/Aug) 20
Purification of Industrial Enzymes with Polyacrylic Acids (Sept) 11
Proteolan, a By-product of the Starch Industry, The Protein Nutritive Value of (Sept) 30

RECENT Developments in Depth Filtration (April) 34
Recycling Some Brewery Wastes to the Brewhouse (April) 4
Removal of Faecal Coliform by Biological Oxidation (Jan/Feb) 18
Reverse Osmosis Today (Jan/Feb) 32

SEPARATION Processes in the Biochemical Industries (Sept) 17
Separation Processes in the Biochemical Industries conference and exhibition (May) 3
Sewage Effluent Tertiary Treatment of (Sept) 21
Sewage Process, Package (Jan/Feb) 27
Sewage, Some Critical Views of Selected Processes for the Biological Treatment of (March) 27
Simulation of Filtration and Extractions Followed by Coordinated Optimisations in an Antibiotic Recovery Process—Demonstration (April) 25
SCP Production Facilities, A Survey of (Dec) 32
SCP Yields, A General Stoichiometric and Thermochemical Model for (Dec) 2
Solvents From Hydrocarbons: Some Economic Considerations (April) 32
Some Critical Views of Selected Processes for the Biological Treatment of Sewage (March) 27
Stabilisation of Enzymes by Glycosylation (July/Aug) 25
Sterilisation Process Evaluation, The basis of (May) 26
Suspension Cultures, A novel method of growth estimation for (May) 41
Starting Investigational and Production Cultures (April) 7

THE Application of Anaerobic Digestion to Producing Methane Gas and Fertliser from Farm Wastes (March) 32
Tertiary Treatment of Sewage Effluents (Sept) 21
The Basis of Heat Sterilization Process Evaluation (May) 26
The Computer in the Brewhouse (April) 10
The production of Amino Acids (March) 4
The Role of the Quality Control Chemist in the Food Industry (May) 30

The Protein Nutritive Value of Proteolan, a By-Product of the Starch Industry (Sept) 30
The Utilisation of Dairy Products in the Food Industry (Oct) 13
The Water Industry: A Review Relating to Waste Water Treatment (March) 37
Trade Effluent Treatment in Singapore (March) 22
Tree Bark—a Usable Commodity (July/Aug) 41

USE of Belt Discharge Vacuum Filters to Increase Plant Capacity (April) 42

WASTES, The application of Anaerobic Digestion to Producing Methane Gas (March) 32
Waste Wat r Treatment, The Water Industry: a Review Relating to (March) 37
Water Analysis, Application of Automatic Equipment to (June) 44
Water Industry: A Review Relating to Waste Water Treatment, The (March) 37
Water Research Centre, Developments at (Sept) 24

YEASTS for Molasses Alcohol (March) 10
Yoghurt Manufacture, Continuous Fermentation in (June) 39
Yoghurt Production by Lactobacillus Fermentation of soybean Milk (May) 23

Authors Index

S. AIBE and M. Okabe, Simulation of Filtration and Extractions. Followed by Coordinated Optimisations in an Antibiotic Recovery Process—A Demonstration (April) 25
R. A. Andren, M. H. Mandels, J. E. Medeiros, Production of Sugars from Waste Cellulose by Enzymatic Hydrolysis: Primary Evaluation of Substrates (Oct) 2
Anon, Developments at the Water Research Centre (September) 24
Anon, BASF Opens Giant Effluent Treatment Plant (Jan/Feb) 35
Anon, Reverse Osmosis Today (Jan/Feb) 32
Anon, Protein Application Laboratory Opens (May) 46

S. A. BARKER, Pure Fructose Syrups (Dec) 20
W. Bennett, Use of Belt Discharge Vacuum Filters to Increase Plant Capacity (April) 42
M. J. Blogg, Processing of Animal By-products (Dec) 9
W. A. Bough, Chitosan—A Polymer from Seafood Wastes—for use in Treatment of Food Processing Wastes and Activated Sludge (Jan/Feb) 13
K. A. Brabbin, Purified Water in the Pharmaceutical Industry (Nov) 12
H. Buhler, W. Ingold, Measuring pH and Oxygen in Fermenters (April) 20

C. T. CALAM, Starting Investigational and Production Cultures (April) 7
C. Cantarelli, A New Method of Grape Processing for Wine Making by Comminution and Centrifugation (Nov) 15
T. B. Christensen, G. Vegarud, A. T. Birkeland, Stabilisation of Enzymes by Glycosylation (July/Aug) 25

J. G. DAVIS, The Utilisation of Dairy Products in the Food Industry (Oct) 13
J. N. Done, High Speed Chromatography (May) 6

S. V. FAULKNER, A New Approach to Sulphur Dioxide Analysis (May) 47
A. M. Filbert, W. H. Pitcher Jnr., Immobilised Enzymes for Industrial Application (Sept) 3

T. Fujii, K. Matsumoto, T. Watanabe, Enzymatic Synthesis of Cephalexin (Oct) 21
C. GENNER, Evaluation of the 'Dipslide' Technique for Microbial Testing (July/Aug) 39
